Simple books for monthly closing

Journal, ledger, and trial balance stay connected here. Manual entries update instantly, while billing invoices are grouped into one automated sales close at 10 PM each day so your books stay clean.

Open any book

Pick the view you need, then use the popup filters for month and year.

JOURNAL

View date-wise postings with debit and credit lines exactly as they enter the books.

LEDGER

View account-wise posting movement, opening balance, and closing balance for the selected month.

TRIAL BALANCE

Check debit and credit balances at month close to confirm the books stay aligned.

+ Add entry

Use **Add entry** for manual purchases, expenses, salaries, and other adjustments. Finalized invoices do not flood the books one by one; they are grouped into a single sales close entry after 10 PM.

Weekly miscellaneous stack

Log tea, coffee, snacks, and other tiny staff spends here during the week. They stay out of the books daily and roll into one combined Sunday 10 PM close entry automatically.
